Pain Reliever

Gel

RapidRelief Gel – the all-natural pain relief formula that will give you your life back

Everyday, millions of people across the country live with chronic aches and pain that limits their activities, causes constant discomfort, and alters their lives. It's a common problem – but the good news is, it doesn't have to be that way.

Doctors commonly refer to this discomfort as musculoskeletal pain, but it encompasses a wide variety of pains including arthritis, lower back pain, carpal tunnel syndrome, fibromyalgia, and muscular pain, just to name a few.

Typically, doctors react to this oft-heard complaint by prescribing a barrage of medications including muscle relaxers and pain killers.

While affording some relief, these prescriptions often deliver a heavy dose of unpleasant side effects including extreme drowsiness, fatigue, even headaches and nausea. Millions of Americans sleep-walk through their day, all in an effort to rid themselves of the constant pain that accompanies their every move.

What's more, these medications don't really work to alleviate the source of the problem. They simply mask the pain, or relax the muscle for a short while. When the medication wears off, the pain returns with a vengeance.

To afford yourself true pain relief, you need a pain reliever that

works at the source of the pain, all the way down to the muscle. You need a formula that works to give your body the specific, all-natural components that it needs: moisture, oxygen, and pain-killing minerals so that it can displace the toxins and irritants that are the true source of the pain.

And more than that, you need a pain relief formula that is safe and reliable, and won't deliver a host of negative side-effects.

You need RapidRelief. RapidRelief is the pure, all-natural pain relief formula that has been delivering restored good health and vitality to thousands of people just like you across the country. We'll learn more about this revolutionary formula in the pages to come, but first, let's explore the root of the problem.

Counting the Costs

Musculoskeletal pain effects millions of people each year costing them dearly, anywhere from missing out on some personal

freedoms, all the way to lost mobility or complete loss of self-reliance. And it hits you in your pocketbook too, costing countless millions of your dollars in lost wages, worker's compensation, unemployment, and insurance premiums. So many people are seeking relief from this common ailment, that a multi-billion dollar industry has sprouted around it. Companies are raking in billions of dollars from self-help books, medical specialists, websites, audio and video tapes, exercise gurus, and pharmaceutical companies—just to name a few—who are all too pleased to take your money and attempt to help you “manage” your pain.

But I think you'll agree that too much is at stake to merely “manage” pain—it needs to be eradicated.

Doctors label pain sufferers into one of three categories: Your pain is considered *acute* if you have experienced it for less than six weeks at a time; *sub-acute* if your pain lasts from six to twelve weeks; and finally, your condition would be labeled *chronic* if you experience the pain for longer than twelve weeks. No matter how long you may suffer from pain, I think you'll agree that even one day is too long.

Why 'Manage' Pain When You Can Eradicate It?

Many doctors talk of “managing” your pain as a way of dealing with it on a day to day basis. Sometimes I wonder if the doctor isn't really trying to

“manage” the patient. Doctors often prescribe the same tired out methods that they've been recommending for years, with few positive results.

It's often said that the definition of *insanity* is doing the same thing over and over again and expecting a new and different result. Are you dealing in an “insane” manner with your pain?

- Are you slathering on the same topical medication day after day hoping to yourself that perhaps today will be the day it will work?
- Are you banishing yourself from life, trying to relax away the pain?
- Have you been from doctor to doctor looking for the cure to your pain that seems to have no cause?
- Do you endure the pain of sitting through a long car trip by trying futile visualization or relaxation techniques?

Now is the time to finally stop your pain forever and even prevent it from ever starting in the first place.

Introducing... RapidRelief

RapidRelief is a revolutionary, all-natural pain relief formula that stops pain on contact and will even prevent pain before it begins. **RapidRelief**, rigorously tested and documented, restores good-health to millions of Americans who suffer from chronic pain from common

conditions such as:

- arthritis
- fibromyalgia
- muscle pain
- lower back pain
- sciatica
- carpal tunnel syndrome
- sports injuries
- and even that chronic “phantom” pain that is so difficult to treat.

For years, RapidRelief was a well-kept secret of the top echelon of world-class athletes, and it is now available to *you*. Stop your pain forever with **RapidRelief**.

The RapidRelief Difference

Many over-the-counter topical pain relief formulas promise “immediate results,” but deliver unpleasant effects such as greasy hands, stained clothing, overwhelming odors, uncomfortable burn, and something short of total pain relief. They are minimally effective, at best.

Pain relief medications prescribed by a physician offer a bit more relief, but can make you experience nausea, extreme drowsiness, sleeplessness, headaches, and other inconvenient and uncomfortable side effects. What an oxymoron...pain relief that is uncomfortable!

So what makes **RapidRelief** different?

RapidRelief, an all-natural topical gel, made from an

extraordinary water-based formula. As a matter of fact, the secret to **RapidRelief** is in the water. Its amazing formula was discovered after the location of a remarkable hidden underground Bahamian spring. The unique water from this spring is among the purest and softest known to man. The elemental conditioners found only in this water, when combined with high-energy microscopic mineral particles, enables **RapidRelief** to absorb deeply into the skin at the point of application, and to attract moisture and oxygen into the underlying cell-structure, displacing the toxins and irritants at the source of the pain.

RapidRelief is engineered to work quickly and decisively at the source of the pain. This remarkable ability stems from the carefully crafted molecular arrangements of the microloids and conditioners in the formula. This remarkable combination opens your skin's pores, and allows the gel to go right to work, directly where it is needed most, instantly. You won't have to feel additional burn to know your pain relief is working – you'll know because the pain will disappear.

This all adds up to immediate pain relief that won't ruin your day. Enjoy driving your car *pain free* without fear of falling asleep at the wheel. Enjoy sharing lunch with your friends after a round of golf *pain free* without fear of nausea. Enjoy playing with your children or grandchildren *pain free* without a nagging headache. Enjoy reading your favorite book or magazine without falling asleep because you missed a good night's sleep due to pain or some pain medication.

Nature's remedy proves best once again.

We Made It For You

Yes, **RapidRelief** is safe and effective, but you may be wondering, "Is it right for me?" If you've tried *everything* including following your doctor's orders, exercising, managing your weight, watching your diet, reducing stress, and still, your pain persists, **RapidRelief** is for you. If you are one of the fifty-million people today who experience the common pains associated with muscle aches, lower back pain, and pains from exercise and sports injuries, then **RapidRelief** is not only *right for you*, it was *made for you*.

Okay, you may say, "Everyone experiences a pain sometime, but what about my chronic condition? **Can RapidRelief even help my...**

...Osteoarthritis Pain?

You bet. When the cartilage in your joints break down and the bones begin to rub together, the joint gets out of alignment and painful bits of cartilage float in the fluid around the joint. Scientists have formulated **RapidRelief** with the ability to go straight to the root of the pain, relieve the soreness from destruction that has occurred within the joint, and allow you freedom of movement once again.

...Fibromyalgia Pain?

You can count on it. How frustrating to be one of the 3.7

million people a year who experience chronic, and often debilitating muscle pain that has no clear, defined cause! Simply massage in **RapidRelief** at the source of the pain, usually where the muscle attaches to the bone, and then relax and enjoy the relief. Many people will even find that the depression associated with this condition will fade as well because **RapidRelief** gives hope for a healthy future and will finally end the pain that doctors just can't seem to pinpoint.

...Carpal Tunnel Pain?

No doubt about it. Experts say that Carpal Tunnel Syndrome (CTS) is the occupational disease of the of the decade. Tens of thousands of workers are experiencing pains and spasms caused by repetitive high-speed motions on the job. Today, more than half of the workers have jobs with the potential for CTS, according to a recent report by the National Institute for Occupational Safety and Health. CTS strikes men and women who use machines like computers or hydraulic nail guns and then worsens when using sewing machines or pianos during spare time. Work and even play become impossible for someone experiencing the searing pain of CTS.

If you or those you love don't currently experience the pain associated with CTS, the regular application of **RapidRelief** prior to the use of computers or before other actions involving high-speed repetitive actions with your wrists

(continues...)

and fingers will actually stop the pain of Carpal Tunnel before it even begins.

...Sciatica Pain?

Absolutely. Sciatica is a painful condition that begins in the lower back or buttock and shoots along the back of the legs. It is usually caused by pressure on the sciatic nerve and doctors often prescribe surgery if the pain grows too intense. **RapidRelief** will go to work at the source of the inflammation, working to relieve the irritated place where the bone is pinching the nerve, and almost immediately, relief is found.

If RapidRelief Can Stop the Pain of World-Class Athletes— It Can Stop Yours, Too.

No one uses and pushes their body quite like the professional athlete. Daily strenuous workout regimes, limiting diets, long hours, and rigorous traveling schedules places stress and strain on every inch of their bodies, and pain seems, at times, a normal part of their day. But sometimes, the pain gets severe and like us, their bodies just want to shut down in response to the unrelenting hurt.

- Roger Clemens, pitcher for the Boston Red Sox, throws his arm out while preparing for the 1992 World Series. A friend and former teammate suggests that Roger try **RapidRelief**. Federal Express delivers the gel, Roger applies it to his arm, and

within minutes, total relief. Roger Clemens is back in the game.

- Bart Vale, 1995 World Champion Shoot Fighter, pulls a back muscle while preparing for his upcoming HBO pay-per-view match to be held in Japan. A friend suggests he try **RapidRelief**. He applies the gel, and the next morning, boards his plane for Japan right on schedule. After retaining his title, Bart Vale is never without his **RapidRelief** close by. He now applies the gel before and after every training session.

- Mary Pierce, sixth ranked women's tennis player in the world is training at the world famous Bolletteiri Sports Academy for the upcoming French Open. Mary pulls a groin muscle and the tournament seems hopeless. Nick Bolletteiri suggests that Mary try **RapidRelief**. Mary takes his advice and is shortly back on the court ready to compete in top form.

If **RapidRelief** can help these world-class athletes, imagine what it can do for you!

You Can Get Amazing Relief With RapidRelief, Too—Here's How

RapidRelief is available directly from Natural Option Corporation to you. Each 4 ounce gel is just \$27.99 plus \$6.95 for shipping and handling. Ordering

is fast and easy. If ordering by credit card, you may call our office, toll free at (800) 516-9796 or fax your order to (800) 725-8370. If you prefer, simply mail your order along with check or money order to our office at Natural Option Corporation, 2828 Coral Way #206, Coral Gables, FL 33145.

Of course, Natural Option Corporation backs every purchase with its unconditional, iron-clad money back guarantee. If you're not happy with your purchase for any reason, simply return the unused portion, and Natural Option Corporation will refund your entire purchase price.

Take a moment now, and put a stop to your pain forever. Place your order today, and we'll rush your RapidRelief Gel out to you immediately.
